

Oscar Had A Heap of Apples!

Leave all answers in reduced, simplest radical form.

Connect the answer dots in order

- | | |
|--------------------|--------------------|
| 1. $\sin(A)$ | 16. $\cot(\theta)$ |
| 2. $\cos(A)$ | 17. $\tan(F)$ |
| 3. $\tan(A)$ | 18. $\csc(A)$ |
| 4. $\sin(F)$ | 19. $\sin(\theta)$ |
| 5. $\sin(I)$ | 20. $\cos(\pi)$ |
| 6. $\csc(I)$ | 21. $\cos(C)$ |
| 7. $\tan(G)$ | 22. $\sec(A)$ |
| 8. $\tan(I)$ | 23. $\sin(C)$ |
| 9. $\cos(J)$ | |
| 10. $\cos(L)$ | Start a new line. |
| 11. $\tan(L)$ | 24. $\cos(\alpha)$ |
| 12. $\tan(\phi)$ | 25. $\sec(I)$ |
| 13. $\csc(\phi)$ | |
| 14. $\tan(\pi)$ | Start a new line. |
| 15. $\sec(\alpha)$ | 26. $\csc(L)$ |
| | 27. $\sin(E)$ |

A collection of 27 dots, each labeled with a trigonometric value. The values are: $\frac{13}{37}$, $\frac{5}{\sqrt{5}}$, $\frac{5}{4}$, $\frac{12}{13}$, $\frac{4}{5}$, $\frac{5}{3}$, $\frac{3}{5}$, $\frac{7}{2}$, $\frac{\sqrt{2}}{2}$, $\frac{2\sqrt{13}}{2}$, $\frac{1}{\sqrt{2}}$, $\frac{13}{2}$, $\frac{1}{12}$, $\frac{3\sqrt{2}}{3}$, $\frac{12}{37}$, $\frac{4}{3}$, $\frac{3}{\sqrt{13}}$, $\frac{3}{3\sqrt{2}}$, $\frac{15}{3\sqrt{5}}$, $\frac{3}{2}$, $\frac{13}{12}$, $\frac{35}{12}$, $\frac{2\sqrt{5}}{15}$, $\frac{2}{7}$, $\frac{7}{4}$, $\frac{37}{12}$, $\frac{12}{35}$, $\frac{3\sqrt{5}}{7}$, $\frac{2}{3}$, $\frac{1}{7}$, $\frac{23}{37}$, $\frac{37}{40}$.
